

# The Chauvin Chronicle

AN INDEPENDENT WEEKLY NEWSPAPER CIRCULATING THROUGHOUT  
ARTLAND, CHAUVIN EDGERTON, RIBSTONE, MERTON, SIFTON, & MANITO LAKE

VOL.8: NO.366 CHAUVIN, ALBERTA, WEDNESDAY JUNE 1st 1921 5c. per copy \$2.00 per year in advance

## Chauvin School Sports Were Greatly Enjoyed By All

The local school had a very successful sports day on Tuesday last. The weather was ideal—warm with just enough wind to keep the heat from being oppressive. A large attendance both from the immediate neighborhood and from more distant points like Edgerton and Wainwright. The baseball games were played on diamond at the athletic grounds and the athletic events were held in front of the grand stand. Miss Freeman took charge of the children and is to be congratulated on the masterly way in which she had the childrens events run through so smoothly and successfully. Messrs Keatley and StPierre very ably assisted.

The results of the races, etc., are:—  
Running Broad Jump, Boys under 80 lbs: 1 Geo. Morrow; 2 Edward Villa; 3 Benny Wheeler

Running Broad Jum, girls under 80 lbs: 1 Elma Hass; 2 Elsie Goede; 3 Stella O'Brien

Running Broad Jump: boys 80 to 110 lbs: 1 Edward Cahill; 2 Ernest Pitman; 3 George Woodward

Running Broad Jump: girls 80 to 110 lbs: 1 Lilian Cahill; 2 Janet Auclair; 3 Ethel Goede

50 yard dash: boys 1 G. Morrow; 2 R. StPierre; 3 A. StPierre

50 yard dash: girls: 1 Elma Hass; 2 Ronie Forryan; 3 Elsie Goede

100 yard dash: boys: 1 W. Borre gard; 2 E. Mathieson; 3 W. Robinson

100 yards dash: girls: J. StPierre; 2 L. Cahill; 2 Elsie Goede

100 yard dash: open: boys 1 S. Etson; 2 E. Mathieson; 3 Frank Dabels

100 yard dash: girls: 1 J. StPierre; 2 Heather Richardson; 3 Lilian Cahill

Sack race: boys: 1 R. StPierre; 2 Frank Dabels; 3 A. StPierre

Sack Race: girls: 1 Lilian Cahill; 2 Ronie Foryan; 3 Ruth Parcels

Three legged race: under 80 lbs: boys: 1 R. & A. StPierre; 2 Raymond D'Albertanson & Harker Saul; 3 Edward Villa & Ernest Pitman

Three legged race: girls: 1 Barbara & Ronie Forryan; 2 Mamie Cubitt & Elsie Goede; 3 Ruth Parcels & Marjorie Folkins

Three legged Race: boys, 80 to 110 lbs: R. & A. StPierre; 2 W. & F. Dabels; 3 Raymond D'Albertanson & Harker Saul

The first game of baseball between Edgerton and Chauvin High resulted in a win for the former, 6-4. Edgerton played a steady, consistent game and well earned their win. Cecil Burton pitched a fine game for the Chauvin High School.

The next game was between Ribstone and Chauvin Seniors. Ribstone was slightly weakened through the illness of some players but they put up a game fight. Chauvin, however, had gathered a fairly strong team, many of them being by gone semis. They gave Quam good support and with his control working the Ribstone team was shut out, 11-0.

The teams lined up: Chauvin: Paquet, Stewart, Reynolds, Laws, Leach, Mathieson, Sigurdson, Pierce.

Ribstone: Clifford, Dawn, Wiles, Wild, Etson, Carruthers, Burton, F. Clifford, C. Clifford

Messrs Freeman and Spornitz ably officiated.

At 4.30 everyone adjourned to meet at the school-basketball field to see the stellar attraction of the day—the game between Wainwright and Chauvin High Schools. The teams lined up: Wainwright; Wakefield, Murray, Schlofield, Maybee, Love, Lory, Chauvin; Hass, Ellis, Villa, Saul, Cahill,

## Local Committee Red Cross Plans

If present plan of the Chauvin Chauvin branch of the Canadian Red Cross Society materialize, every person residing within the confines of this province will be within reasonable distance of a hospital doctor or Red Cross nurse, provincial executive officers announced today.

One of the most important tasks included in the work of the Red Cross is the bringing of pioneer settlers closer to medical assistance in case of sickness. With but few exceptions remote districts are far removed from the benefits of a hospital and some of them are many miles from a doctor. Reports presented to provincial headquarters by investigators of the Red Cross have, from time to time, revealed most distressing instances of where people unfortunate enough to suffer accidents have had to undergo excruciating pain for hours while medical attention has been secured, many times at the expense of physical hardship on the part of the doctor.

The Canadian Red Cross Society, through provincial branches has already established small outpost hospitals, of an emergency character, under the supervision of a qualified nurse, to cope with urgent requirements. Extensive settling on the land, as a result of the activities of the Soldier Settlement board has shoved the fringes of civilization back a few more miles and has in all cases put a greater distance between these families and medical attention.

This work of establishing outpost hospitals is not being carried on exclusively by the Red Cross, but rather through co-operation with the provincial boards of health. Money and nurses have been provided freely, according to the need, and the results obtained to date have fully justified the outlay.

The membership drive, which will commence on June 5, will give every Canadian an opportunity to become associated with this work by becoming a member of the Red Cross Society.

Hass.

Wainwright came determined to win and they played an aggressive game from the first sound of the whistle. Chauvin fought hard, but were off color and were defeated by a score of 11-4. Wainwright is to be congratulated on possessing such an excellent team as this makes the second time they have beaten the Chauvin girls, who incidentally are a strong aggregation.

Following this the Edgerton H. S. girls played the Chauvin second H. S. team. Edgerton: Wheeler, Challenger, Haggerty, Martin, Spornitz, Milne, Chauvin: McSporan, McAllister, Ar-mour, Cahill, Goede, Richardson.

The game was hotly contested, the score being 6-5, with Edgerton coming strong.

Mr Clifford supplied the refreshments at the grounds.

H. S. girls played the Chauvin second H. S. team

RECEIPTS	
Receipts	66.70
EXPENDITURES	
Wainwright	20.00
Edgerton	20.00
Ribstone	5.00
Chauvin B. B. Club	10.00
Baseballs (G. W. Allan)	10.00
Gatekeeper (Mr Herbert)	3.00
Printing and Postage	3.50
Fixing Grounds	1.20
H. S. Basketball Teams	5.00
Total	66.70

## Leaholme U. F. W. A

The Leaholme U.F.W.A. held a very enjoyable meeting in the addition on the school house on the afternoon of May 26. Seven ladies being present. Mrs. Chas Miller in the chair.

The motions

On motion of Mrs. Miller—Mrs. Ferguson the minutes were adopted as read. Carried.

Moved by Mrs. W. Miller—Thilda Anderson, that we send at least one delegate to the Wainwright convention in June 22 and 23.

Moved by Mrs. Rodden—Miss Ferguson that we send and get sewing material to use in making articles for sale of work later on. Carried.

Mrs. W. Miller and Mrs. Ryall to meet for June 30.

Moved by Mrs. Miller—Mrs. Ferguson that Elsie Ferguson and Thilda Anderson be a committee of two to interview the Athletic Association in regards to having a social evening near future. Carried.

Meeting adjourned by order of Pres.

The next meeting will be held in the evening on June 10.

Leaholme U.F.A. are sending two lads, and Leaholme U.F.W.A. five girls up to the University Week for Farm Young People to be held at the University of Alberta, June 8th to 14th. The program will cover six full days with an intermission of one afternoon. In the forenoons lectures and addresses will be given on subjects of interest and importance, with special attention to agriculture and questions bearing on the development of rural communities. The afternoons will be devoted to practical work, and will include field work in nature study, visits to the University farm, etc. The evening meetings will be of a popular nature and will include educational motion pictures and community singing.

The members of the Sunday School committee will be elected June 5th, after the service at Brady.

Don't forget the next Ladies Aid meeting to be held at Mrs. Wm. Forans on June 1st, at 2 o'clock. We look for a full attendance.

The Artland Post office has recently changed hands. Mr. A. McRae has taken over the duties of Postmaster. He is busy building an addition to his house to accommodate his post office.

The frost of Friday night must have done considerable harm in some sections for many of the green leaves have turned yellow since then, so it is almost certain that the fruit blossoms were damaged. The saskatoon, cherry and strawberry blossoms were very abundant but the frost must certainly have killed them.

All the new extension work on the Manitou Lake Telephone line has been completed, making an additional 23 new phones in operation.

You should just see our new garden! Seeing is believing!

The boys were greatly disappointed at not being able to go to Edgerton last Friday owing to the storm.

They intend to journey to Airlie on Friday next to give battle to the Airlie stalwarts. The battle is to commence at 3 p.m.

Big things are likely to develop on Saturday evening. Charles Kirby is to bring in a team that will show Chauvin just how baseball ought to be played. The stage will be set on the Chauvin baseball field, the time, 7 p.m., the day Saturday next.

From 1900 to 1920 over 500,000 entries were made for free grant homesteads in Manitoba, Saskatchewan and Alberta, involving 8,000,000 million acres of land.

## Notes from North East

A movement is on foot to hold a United service of the 3 Grain Growers Association's (Brady, Marsden and Fram) on June 19th in Brady School, this date being set apart by the S.G.G.A. as Grain Growers Sunday. Further details will be announced next week.

Fram G. G. Association will hold their usual monthly meeting in the Schoolhouse on Saturday next, June 14th, when it is hoped that all members will attend, as important business will arise.

All the new telephones have now been installed in the district, and it is hoped that the question of long distance will be definitely settled in the near future. The sooner the better.

## ARTLAND ARGUS

After the memorial service for the late Robert R. Jukes, an election of a church committee was held and the following are the results:

Messrs. Paterson, Geo. Lawson, C. Gabrielson and J. A. Graham, Messdames Paterson, Watson, and Coe elected for office.

On this coming Sunday, June 5th, Mrs. K. W. Coe will take the Sunday School Class, commencing at 2.30 o'clock. Mr. Park will deliver an address to the Sunday School Class, at Cliffe School at 11.00 o'clock and at Service at Brady will commence at 3.30. Mr. Park will also hold service Stanmore at 7.30 o'clock.

The members of the Sunday School committee will be elected June 5th, after the service at Brady.

Don't forget the next Ladies Aid meeting to be held at Mrs. Wm. Forans on June 1st, at 2 o'clock. We look for a full attendance.

The Artland Post office has recently changed hands. Mr. A. McRae has taken over the duties of Postmaster. He is busy building an addition to his house to accommodate his post office.

The frost of Friday night must have done considerable harm in some sections for many of the green leaves have turned yellow since then, so it is almost certain that the fruit blossoms were damaged. The saskatoon, cherry and strawberry blossoms were very abundant but the frost must certainly have killed them.

All the new extension work on the Manitou Lake Telephone line has been completed, making an additional 23 new phones in operation.

You should just see our new garden! Seeing is believing!

## Chauvin W. I. Notes

The regular meeting of the W.I. is postponed from Saturday June 11th until Saturday June 18th; owing to the exhibit of work and sale of Home Cooking in the Westminster Church. Further notice as to the June meeting will be given.

## AIRLIE U.F.A.

Airlie U.F.A. picnic will be held on Friday, June 3rd. Sports to begin at 1 o'clock. A full program of Athletic events Baseball, basketball, races etc is being arranged. A dance will be held in the evening.

## EDINGLASSIE U. F. A.

The next regular meeting of the Edinglassie U. F. A. will be held at 7.30 p.m., Thursday June 9th

## Local Notes Of Interest

Miss Dorothy Smith spent Sunday with Mrs. J. Wright.

A party gathered at the home of Mr. and Mrs. George Beatty Sunday, including Mr. and Mrs. Jeff Swan, Mr. Murray, C. Sigurdson, Mrs. and Miss Sigurdson.

Mrs. Blair, who was hurt by a horse at the childrens sports is being taken care of by Mrs. L. E. Roy.

Selius Djuff of Dina, was a business visitor to Chauvin on Monday...

The Chauvin city fathers have been their 1921 civic improvements, by doing some grading on Main street. At the same time they are levelling First Ave. East.

A new regulation recently put in force by the Federal Department of Mines provides that in future lapsed oil claims shall not be available for releasing on application, but shall be offered for sale by public tender.

George F. Reynolds has started his fine percheron stallion, Prince Al, 5012, on the road for the season.

The tree in the "Johnnie Walker" box is still going strong. Anyone else got a few "Johnnie Walker" boxes to spare—Don't all speak at once, please.

Jeff Swan reports breaking to be dry where the prairie has been burned off, though it is not so bad where the grass has not been burned.

The frost last week played havoc with the early gardens. Quite a large number are compelled to re-seed. No damage is reported to the crops, other than a few days delay.

Do not forget that the M. D. Ribstone council meeting and Court of Revision will be held at Ribstone on Saturday next, commencing at 10 a.m.

Adlerika may now be obtained at the Chauvin Pharmacy—price \$1.40 per bottle.

Membership tickets of the Chauvin Athletic Association are now on sale.

The Woodford School District intends to let out on contract the painting of their School House. The Mead of Trustees will hold a meeting on June 4th, at 4.00 o'clock p.m. in the School house where they will be ready to receive tender's bids.

Mr. and Mrs. W. Wright, of Artland motored into Chauvin yesterday.

Geo. Lawson, of Artland visited Chauvin, Tuesday.

Mr. L. B. Nicholson of Dina was a visitor to Chauvin last week.

"Do it now" is a pretty good rule and one that should not be forgotten in Gopher Poisoning. One gopher killed now will save a lot of trouble later. Strychnine, Gophericide, Kill-Em-Quick, Micklesons, My Own and Eveready always in stock.

The Chauvin Pharmacy

## EDGERTON SPORTS: JUNE 15

The Edgerton Sports Committee announce that Edgerton Sports will be held on Wednesday June 15th. Full particulars as to prizes and events will be made public later and they hope that the good people of Chauvin will turn out in good force.

## Editor's Table

## LONG AND SHORT CREDITS

One of the handicaps under which many farmers are operating is the lack of working capital. They may have their farms almost, or quite, clear and yet not have the money to purchase necessary machinery or live stock that would ensure the fullest returns.

Credits for longer or shorter periods may be a marked advantage to a man who is making a start or to one who is undertaking a new line of effort, or even to tide over a year of short crops. In several of the provinces this need has been recognized and loan boards organized to finance men who wish to have a little extra capital. The Better Farming Commission of Saskatchewan in its recent report outlines very clearly the working of credit schemes.

Long farm credits, says this report, are as a rule secured by fixed assets such as real property and farmers have several agencies through which these can be secured—the provincial farm loan board, life insurance companies, trust companies and regular real estate loan companies. As a rule loans can be obtained from these for a term of five or ten years. The proceeds of such loans on fixed assets will naturally be used for making permanent improvements as buildings, fences or purchase of more land. The security is mainly the land on which the loan is advanced though the reputation of the borrower is an important factor.

Short term credits are usually made for some special purpose such as operating expenses while a crop is growing, lumber for a granary needed to house the crop, or buying steers to fatten for market. As a basis for such credits the lender must always take into consideration the borrower's ability to pay as well as his honesty. The ability to pay is largely based on what his statement discloses in the way of liquid assets such as (in the case of a farmer) live stock, which is being prepared for market, grain, wool or some other product of the farm.

One point must always be kept in mind, and that is that credits of any kind are always a business transaction and not a donation. In the case of a bank, it is not handling its own funds, but trust funds, which it has agreed to return to the owners, and which are left with it on the express understanding that it will not take undue chances with them. Proof that a person is able to make profitable use of credit usually makes him a welcome borrower.

## 1921 CENSUS STATISTICS

Enumerators started yesterday on the work of taking the sixth census of the Dominion of Canada, and as some of the questions may require careful thought and figuring before giving a reply, we give below some of the questions which are required to be answered:

After getting the name, age, post office and birth place, the enumerator will want to know how long you have operated the farm as owner, and as a tenant or both; if worked on shares, and the basis; total acres in farm, acres improved, acres woodland, acres unbroken prairie, acres wet marsh, land not harvested in 1920 on account of crop failure, acres in pasture, in 1920 and in 1921, acres lying idle or fallow in 1920 and in 1921.

Total value of farm, with buildings, implements, machinery, all given separately.

The expenses on the farm; amount expended for hay, grain, etc., for use as feed for animals, amount spent for manure and fertilizer, amount in cash for seeds, for labor, estimated value of house or room rent for laborer and board furnished in addition to wages paid, were purchases made from or through a farmer's co-operative organization.

Under crops, the farmer is required to give the number of acres, the quantity produced, the value of the products and the acreage planted for harvest for 1921 of each of the differ-

ent kinds of grain, grasses, hay, vegetables and other field crops; while supply similar information for each of the kinds of vegetables he grew. Detailed information must be given of each of the varieties of fruit grown, both in field and green house.

All horses and cattle must be described, and the number of each, age, and the value are asked. The number of cows milked, the quantity produced and the quantities of both milk and cream sold to the factory, the butter made on the farm and the cheese must be answered.

The sheep, swine, poultry and bees

are all analyzed in detail.

The numbers and values of the animals raised on the farm and slaughtered for use, and the numbers sold alive in 1920 must be given in detail.

Each purebred animal, as well as poultry, must be dealt with separately.

A long list of questions are also asked about the farm facilities, cooperative marketing in 1920, drainage, irrigation, etc.

In the "population form" the name of each member of the family, household or institution must be given. The place of abode gives the section, town-

ship, range, meridian and municipality; if in city, town or village, the street and number of the dwelling.

The tenure or class of home columns are; Home owned or rented; if rented, give rent paid each month; class of house; materials of construction; rooms occupied by family.

The personal description refers to the relationship to head of family or household; sex; single, married, widowed, divorced or legally separated; age last birthday.

The nativity asks for the country or place of birth of each person.

Under citizenship, the year of im-

migration, the year of naturalization and the nationality are given.

The race, language, religion and education refer to the racial origin, the languages spoken, the religious denomination person adheres to, and the months as school since Sept. 1, 1920.

Under profession, occupation and employment, a number of questions are asked as to place of labor, the total earnings in past twelve months, number of weeks unemployed in past twelve months and the number of weeks illness since June 1st, 1920.

As the enumeration completed must reach the department at Ottawa during the month of June, no doubt the enumerators will have a very busy time compiling the information. You are requested to help the official as much as possible by thinking over the questions referred to above and have the answer ready.

Particulars are now given in regard to the work and rates of pay. These are interesting in view of the fact that they apply to all rural districts. For every name the enumerator places on his roll, he will receive five cents. For registering farms under five acres twenty-five cents will be paid, and thirty cents for farms over this. Stock not on farms is to be registered, and for this there will be a fee of ten cents. If a person living in a residential section keeps fowl or any animals, they are to be registered. Expenses of \$4.50 pr 100 names on population is allowed. For enrolling the names of defectives there is an extra fee of two cents, and also four cents for business men.

The census is to be taken up until May 31. Births or deaths after that date are not to be included. In the country one month will be allowed for the taking of the census, and two weeks for city enumerators.

An official circular issued to all postmasters, contains the following clauses, which will be rigidly and impartially enforced: "Postmasters are warned against allowing notices, other than Post Office notices, from being exhibited in the lobby of the Post Office. The Department is anxious that pressure is often brought to bear upon the Postmasters to exhibit notices of meetings for charitable purposes, "Lost" and "Found" notices, &c, but it is considered that the Post Office, in order that the official notices of the Department may receive the undivided attention which the public interests require, shall not exhibit other than Post Office notices."

Many American purchasers of improved farms have discovered a gratifying feature in the high productivity of cheap Canadian land in the fact that a farm may pay for itself in a single year, returning from the proceeds of the first harvest a revenue in excess of the purchase price of the farm.

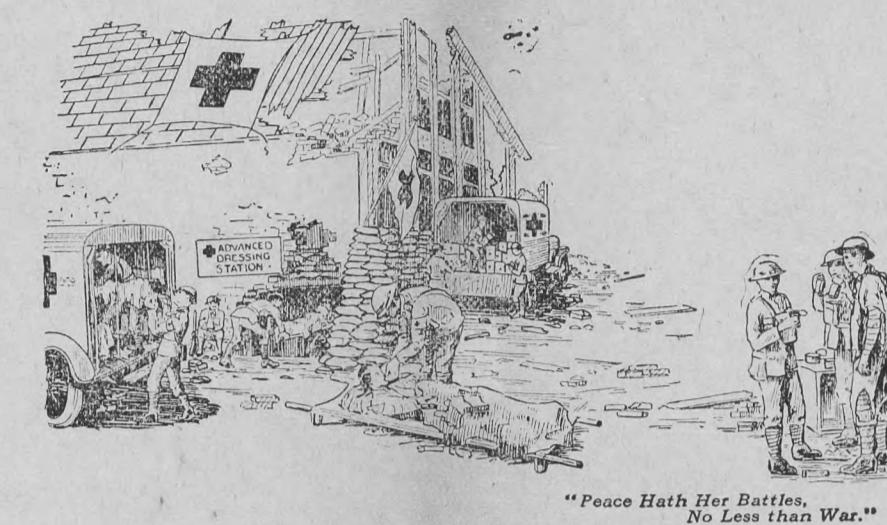

Another of those gigantic animals which roamed Alberta many centuries before the coming of man, a dinosaur, has been discovered and will shortly take its place in the Ontario Royal Museum along with the dinosaur set up in the museum some years ago. This later "find" is of an entirely new species, and is the only one of its kind ever discovered.

American farmers came up to Canada when it is borne upon them that as fine crops are being raised upon the low-priced lands of Canada as upon their own highly held holdings. They see Canadian farmers carrying off the world's premier honors in wheat and oats and successfully competing in corn against the organized corn belt.

The Library of the Dominion Department of Agriculture reports during the year 1920-21 the receipt of the following publications: Pamphlets, 10,692; periodicals, 12,561; bound volumes, 1,345.

The card catalogue now contains approximately 215,000 cards. The total number of books loaned or applied for was 3,090.

An outgo tax would produce a big income.

"Peace Hath Her Battles,  
No Less than War."

## Renew Your Membership In The RED CROSS

During the war everybody gave to the Red Cross. In these Western Provinces, hundreds of thousands of citizens joined in the greatest flood of gifts ever poured through a single voluntary organization.

Because the need was vital, the emergency ever pressing, there was little formality of membership. Everybody belonged to and was a part of the war-time organization of the Red Cross.

Red Cross now has peace-time duties just as important to humanity as its greatest service of devotion in time of war. The Red Cross Societies of the world have leagued together in a broad-gauge, carefully planned continuous campaign—

### For the Improvement of Health, the Prevention of Disease and the Mitigation of Suffering Throughout the World.

This work is to be carried out at home, right here in our own country by our own Red Cross and simultaneously in every one of the thirty-one countries associated in the World League of Red Cross Societies.

The Red Cross peace-time crusade for good health is separate and distinct from the war work of the Red Cross or the great task that it is still carrying on, growing

out of its care of those who suffered in the war. To endorse, support and carry on its peace programme the Red Cross asks the approval of every citizen through the enrollment of his or her individual membership. The Membership Fee is \$1.00 per year. The payment of this dollar when you enroll your name is all the money the Red Cross is asking of you.

### Enroll

*As the outward and visible sign of your faith in the Red Cross, your participation in its good work, your support of its world-wide mission for the improvement of conditions under which humanity lives.*

### Enrolment Dates, June 5th-11th

## C. P. R. LANDS

You have possibly been thinking for years of adding some adjoining C. P. R. LAND to your farm acreage

You know the advantage of doing so in the interest of your Mixed Farming Policy and this year may be your last opportunity of securing the land you want

I am always at your service when information relative to the Company's Land is required.

**A. C. GIFFORD**

C. P. R. LAND AGENT,

CHAUVIN,

ALBERTA.

## NEW ELECTRIC METHOD TO INCREASE THE GRAIN YIELD

Seed treated by a new process of seed electrification, a method which, it is claimed, will increase the yield, check the spread of fungoid diseases and improve the quality, has been sown this year by many of the leading farmers in Southern Alberta. A plant for the treating of seed has been established and already its capacity has been taxed to such an extent that an enlargement will be made immediately.

Great claims are made as to the advantages of this system which is known as the Wolfrayn Electro-Chemical process of seed electrification. The process consists in placing the seed to be treated in a bath containing a suitable metallic salt such as calcium or sodium chloride and weakly electrify the same for a length of time appropriate to the seed under treatment. The solution is then run off, and the seed taken out and dried. The object of the salt is not only to decrease the resistance, or, in other words, to increase the conductivity of the seed-coat, but to maintain that

conductivity during the period of germination. Calcium and sodium in correct proportions are, however, plant foods and assist in the after stimulation of root production.

This method is a new one to Canada, but it has been tried with remarkable success in England.

## SUREST FORAGE SUPPLY

Under western conditions, one of the stockman's surest reliances for forage is winter rye. Though not producing so palatable nor nutritious a quality of cured fodder as may be obtained from oats, it is nevertheless a boon in a season of fodder shortage. It makes good late and early pasture, being the last thing to remain verdant in autumn and the first to show green in the spring. As an early pasture, it has perhaps, its most advantageous place to fill in the West.

Winter rye may be seeded alone in July, August or early September but should not be allowed to joint in the fall or it may winter-kill.

There is now in progress at the Dominion Experimental sub-station at

Beaver Lodge, a test suggested by the Alberta department of agriculture. About May 20, 1920, four strips of barley were sown at respectively four, six, eight and ten pecks per acre and a strip of oats shortly after at ten pecks per acre. About a month later, when the spring grain was well up, a rod strip across these grains was drilled to winter rye at about five pecks per acre, using a single-disk drill running shallow. A hoe-drill is recommended by preference for this particular work but none was readily available. The drilling of the rye appeared to mutilate the barley considerably but did not adversely affect the final yield, as careful sampling demonstrated. A good stand of rye was obtained and it seemed to dome through the winter well.

In 1919, a similar experiment was tried, but in that case the winter rye was cross-drilled directly after the spring grain was sown, with the result that it choked the oat crop, reducing the yield very considerably. While some of the rye headed and in consequence of becoming too far advanced, winter-killed considerably. It seems to be important to allow the spring grain to get a good start before cross-drilling such a hardy competitor as rye. In fact, it is necessary in the interests of both grains.

In 1920, the manager of the station had a small area of winter rye, seeded in 1919 on summerfallow. It grew to an average of six feet in height and lodged by a storm so that it was harvested and threshed with great difficulty and expense. Many of the sheaves were eight feet long and nearly all required a second band before they could be stooked.

If by cross-drilling on spring grain, a good stand of winter rye can be secured, so that one preparation will suffice for two successive crops, the rye being probably less rank when grown thus than when sown alone on summerfallow, the above method of seeding may have much to commend it.

## WESTERN CANADA ATTRACTS SETTLERS FROM ACROSS LINE

Nearly fifty-thousand emigrants came from the United States to Canada in the year 1920 to make permanent homes in the Dominion. Practically all of these, it is estimated, were experienced agriculturists who either secured free government homesteads, or purchased improved farms. Whilst this very desirable contribution to Canada's man power, deposited in the manner to best serve Canada's need, is only about one-third of that of the years prior to the war, it is estimated authoritatively that the Dominion received last year, and during the war years, as many farmers from the United States as she was wont to welcome, and that the classes whose emigration fell off due to war conditions were the industrial, the speculative and others not directly producers. It must also be borne in mind that would-be entrants at the border are sifted as carefully as at the ocean ports, and that in the existing internal conditions, in some months, as may applicants at border towns were rejected for Canadian citizenship as were accepted.

The prevailing exchange situation has been decidedly advantageous to United States farmers purchasing in Canada, and instances have come to light where the entire proceeding of acquiring a new Canadian farm has been transacted on the difference in the exchange of money, the farmer, at the conclusion of the deal being in possession of land of possibly greater acreage and the sum of money for which he sold his United States property intact.

The Canadian Red Cross wishes to give the people the benefit of scientific knowledge through the medium of education and no better way can this education be commenced than by joining the Red Cross during the month of June 5.

Percy E. Reid, dairy commissioner for Saskatchewan is responsible

for the statement that while there was a decrease of 19,455 cows in the province in 1920, there was an increase of 40,000 pounds in the creamery output. The total value of dairy products for the year in the province was estimated at over \$23,000,000, an increase of about half a million dollars over the previous year. There are now 47 creameries operating in the province, 44 of these having their butter graded by the provincial graders. Over half a million pounds of more of government graded creamery butter was sold in 1920 than in the previous year.

Educationalists emphasize the fact that the chief object of school gardens is to broaden the children's minds, the growing of a few flowers and vegetables being only of secondary importance. The layman is likely to be most impressed with visible results. From either point of view, the establishment of school gardens is a work of conservation, for it leads directly to higher development of the soil, and of its greatest human resource—the rising generation of girls and boys."—Commission of Conservation's Monthly Bulletin.

Mr W. F. Stephen, Secretary of the ciation, reports that at least 75 per cent of enquirers for Ayrshire bulls insist that they shall be from high-producing ancestors.

One million dollars is the enormous amount which the farmers of the

three Prairie Provinces have paid during the last three years for the transportation of weed seeds to Fort William and Port Arthur.

## Chauvin Rifle Club

A general meeting of the Chauvin Rifle Association will be held in A. E. Keith's office at 8 p.m. Saturday June 4th, for the purpose of arranging a date for fixing up the range all members are requested to attend, particularly those with teams.

W. J. CUBITT, Captain  
L. LEACH, Secretary  
\* \* \*

The rifle range committee appointed for the purpose of locating a site for a range, have reported a suitable site close in to town and are now waiting the result of next Saturday's general meeting of the association to decide a date for the purpose of fixing up the range, there will be lots of work to do and need at least four teams with scrapers and a plow picks and shovels. The site is located on Doc Folkins pasture and is an ideal position, having the required 600 yards fairly level and a good sight hill for a butt. Doc Folkins has very kindly given permission to the association to use this range, the work required will be the digging of a trench 7 feet deep and about 28 feet long, forming a markers shelter and some firing steps built up at the different ranges. The butts will have to be fenced in to safeguard the cattle. It is to be hoped that every member will turn out at the meeting at Keith's office next Saturday, and before another week is gone the range should be an established fact.

## Ribstone W. I. Notes

A play will be produced by the Ribstone W. I. on June 17th, which will be advertised later.

The fall fair is to be held on September 10th.

## Leaholme U. F. A.

The regular monthly meeting of the Leaholme U. F. A. will be held in the Prosperity School Friday June 10.

## W.L.A. Notes

The president of the Westminster Church W. A. would again call the attention of the members and any wishing to contribute to the exhibit of work; sale of afternoon tea and home cooking held in the church on Saturday June 11th.

The articles for exhibit with the

price and the number of orders the exhibitor is willing to take can be left with Mrs. McNutt any time before the 11th of June.

Contributions for the home cooking sale will be gratefully received.

The regular monthly meeting of the W. A. of the Westminster Church will be held on Wednesday June 8th. at 3 p.m. at the home of Mrs. Watson, Killarney. Arrangements have been made for the necessary cars to be at the church at 2 o'clock. So it is requested that the ladies be at the Church promptly at that time.

## LaPearl Notes

The Y.P.S. of LaPearl church have decided to hold an Ice Cream Social, along with cake, pie and sandwiches, in the church grounds on Thursday evening June 9th to commence at 8 o'clock.

The grounds will be lit up with bright colored lanterns. The girls operating the different booths will represent different international characters in their dress.

Impromptu games of all kinds will be indulged in. Admission free. Pay for what you eat. Come along and bring your friends.

The Red Cross enrollment drive which will be launched on June 5 to increase the membership of the Society to the maximum is one opportunity being given the people of Canada to become part of an organization that lives only for the good it can accomplish and the suffering it can alleviate and prevent.

In view of rapid development of the dairying industry and consequent producing stock, it has been decided by the Minister of Agriculture, Saskatchewan, to extend special assistance to farmers in the matter of herd selection, and with that object in view has appointed C. E. Thomas, of Lloydminster, to take charge of cow testing work in the province. To encourage this work a campaign will be inaugurated under the direction of the Dairy Commissioner. Assistance will also be given to dairymen in respect to breeding problems, economical production of feeds, best methods of marketing dairying products, and other problems relating to the industry that may arise.

A smile is the same in any language.

## Local Notes Of Interest

Robert Clarke, of the Fram district suffered the loss by fire last Friday of five horses, barn and a quantity of hay.

Mr. G. Silk, of Oxbill was a business visitor to Chauvin yesterday.

Mr. W. Pritchett, of Fram was in Chauvin on Monday.

Mr. A. S. Campbell bought a car last week. The same day that he bought the car, he mailed to Edmonton for a license. On Friday, Mr. Campbell drove to Provost in his car, parking it in the street, while attending to his business. On returning to his car, he found that the constable had removed the key and put a notice on the car to apply to the constable.

Mr. Campbell applied to the constable and explained that he had sent for a license which had not yet arrived. The constable paid no heed to this explanation and Mr. Campbell was hauled before a J. P. and fined \$1 for driving his car without a license. We as fellow citizens of Mr. Campbell object to him being made a criminal through the over-zealousness or over officiousness of a constable who has not been long enough a constable to use necessary discrimination in the performance of his duty.

Mrs. Blair, who was hurt at the children's sports by being knocked down by a horse belonging to Mr. Pierce and ridden by Miss A. Saul was taken to her home at Ribstone on Sunday by Mr. L. E. Roy. She is still suffering from the effects of the injury but is making progress towards recovery.

WINNER OF WORLD'S PRIZE  
IN COMPETITION FOR OATS  
DEAD AT LLOYDMINSTER

The death occurred at Lloydminster on May 30th of J. C. Hill who won fame in 1914 by capturing the world's prize for oats, the cup was donated by the State of Colorado.

LOGAN'S ENTIRE HERD  
OF PURE BRED SHORTHORNS  
ARE SLAUGHTERED

Moose Jaw, Sask. May 30—The entire herd of pure bred short horn cattle owned by George Logan, Tuxford, Sask. has been slaughtered following the re-action of every animal to the tuberculin test. The cattle were slaughtered in Regina on Saturday, Mr. Logan is one of the best known cattle breeders in this district and at the recent cattle breeders' association convention here delivered a paper on the necessity for testing all animals.

Mr. Logan's herd was valued at \$9,500 and his loss will be about \$5,000. This morning he stated that his case should be a warning to all breeders.

During April last 2,258 farm settlers from the United States located in Western Canada, official records show

## Short Stories Of A Soldiers' Life

When I arrived at headquarters Brown had disappeared and I yelled down into the Adj't. He came, and stood on the bottom of the steps while I told him what had happened. Suddenly he said, "You have not been dressed yet?" and I answered that I had not. He told me to go and get dressed right away and to never mind more, but I continued to finish my report. Just then a voice behind me said, "Have you any revolver ammunition left, Bradley?" In reply, without looking round, for I knew the voice was the Cop's I took off my belt with my left hand and passed it to him, behind my back, I forgot that my trench dagger was on there and I would not have given \$20 for it then, but I started on shortly without it to go to the dressing station to get my wound dressed.

Getting to the dressing station, at once here the sergeant was close to and some other handy stuff that I had

including the air pillow. We then shook hands and I wended my way up to daylight.

Fritz was putting up quite a bombardment between me and the road and I could see that I would have to be careful and get through the shelled area as quickly as I could. He was shelling behind here with 8 inch stuff and the ground was certainly flying when one of these shells dropped and exploded.

I got to the top of the sunken road and started over the road ground, there for some two hundred and fifty yards then I entered into a trench called the Center way, and proceeded to go down it to get to my objective. Every little while I would bump up against the trench and then, if it was my right arm I would nearly faint. I did this a few times until I got scared that if it happened again I would sure go off in a faint, and then I got reckless again and getting up on the right hand side of the trench, at a place that it was blown in, I continued to walk over the top. Maybe I had gone fifty yards in this exposed way when I heard another shell coming over and I knew that it would drop somewhere in my near vicinity. I turned to where I thought it would drop and waited for it to do so, and I cursed it all the way down and when it exploded the pieces sifted through and as none of them hit me I started on my way again.

The man with the most push soon has a pull.

The woman who cuts too many acquaintances has a hard time cutting much of a swath in society.

A husband is suing for a divorce because his wife spanked him every night. He now proposes to let her paddle her own canoe.

It's amusing to see the way an ordinary sane man will act about his first boy.

It is your "duty" to understand the tariff question.

Finally, after passing two line men fixing up a wire who were so busy that they did not see me go past, I came to the German Trench railway and after going down it for a few yards came to our own railway which lead to K dump. I got between the rails of the railway and it was my sole object in life to keep inside the rails.

After a while I came to the reserve trench and a fellow came over the track which here crossed the trench, and asked me how things were going on at the front, I told him, and asked him if he had any water. He replied that he had and went up the trench for a way to get it. Coming back he handed me the water bottle and I turned it up and nearly drained it, much to his consternation, of course when I was drinking I did not think that this was the only water he had and that he may be for some little time before he got any more. I thanked him and continued on my way, still trying to keep inside the rails on the track. Afterwards in hospital I saw that very treachery with the track across it, in one of the illustrated newspapers.

I arrived at the dressing station and went down into it only to turn around when I heard a shell burst some little distance away. I knew by the sound that the burst had been premature and there were so many men working around there that I wanted to see if anyone had got hurt by it. There were some men working right under where it had exploded, 100 feet up in the air, and I thought that there was some one

wounded by the way they acted but while I was there at the dressing station no one came in, so I may have been mistaken.

I then went to the entrance and into the station and the doctor that was there asked me why I had gone out again, I told him and he laughed. He then started to unwind all the bandages and after he had looked the wound over, he dressed me again and put a red tag on my tunic pocket.

After that I went outside and sat in the horse ambulance that was there.

I had sat there for some time thinking of a ton of things, of which I remember nothing, and on looking out of the affair I noticed that all the men around there were looking past the ambulance at something, of course I wanted to see what they were looking and so I got out of the back of the ambulance and stepping out into the roadway I had just time to step back again out of the way of a monster tank that was just coming up past the side of the ambulance. I stood there and gasped at the thing. It was the first that I had seen so close, and I don't wonder at the Fritzies having been unnerved when they saw those monsters coming over no-mans-land toward them. I got back into the ambulance and watched the tank go over into Posiers' Wood, crawl over a few stumps, knock down a couple of small trees that were in the way, and finally come to rest with much shuffling and lots of smoke.

After a while the driver of the ambulance came and looked in and then he got up to the seat and went down the road at a walk. When we got to La Bosselle the driver came around, after stopping and told me to get out and go to the dressing station at the left of the road. I went into the place and a couple of men got busy and started to unwrap the bandages, I began to wonder how often this was going to take place before I got to Blighty, they looked the wound over with critical eye and after some talk and calling of a doctor I was again bandaged up. There were quite a lot of boys here more or less badly smashed up, but they could all walk and after a while we trooped outside and got into a waiting motor lorry, that had seats along the side. After we had all got inside and the back was put up to stop us from falling out, the lorry started and after going three quarters of a mile came to a halt at Tara hill. Here we were told to get out and again we were unwrapped and wrapped. We were here only for a short time and then into another lorry we went as far as the left side of the road at the brickfield outside Albert. The dressing station here was some swell affair, three tents in the first of which they gave us all a shot of antitoxin and in the second we were again dressed, the third tent was the one that took my eye for in it there were sandwiches enough to feed a battalion and there was a choice of beverages, confined to tea, coffee, and cocoa. Gee! Maybe I didn't wade in with both feet. I'll tell the world that I did.

After we were here some time the tents started to clear and on going outside I saw that they, the wounded men, were going away in London buses. It was now dark and I asked a fellow when one was likely to start to the rear in a bus. He told me to jump in the bus we were alongside of, in next to the driver, this I did and we were on our way without any further trouble at all.

There were a lot of men going into the line and also many lorries passing or I would have liked to ask the driver where we were heading for. I hoped it would be Contay Hospital for I had a very dear friend there, in the Field Ambulance, but when we got to the bottom of the hill, past Vadencourt, we turned to the right and went north for some kilos, I do not remember the name of the place at which we got off the buses. I was pretty well all in, but I remember the doctor who dressed me saying to an orderly. "Watch this man, and if his arm starts to bleed again bring him in." The orderly then took me to a tent in the rear and there were about 50 men laid down asleep, he pulled down

some blankets that were laid on the ground and told me to crawl in. I must have fallen asleep almost instantly for I did not remember anything more until someone shook me and said "Come on, you have got to get your arm dressed." Damn! I was beginning to think that there would be nothing left for me to do in life but let doctors and stretcher bearers dress my arm. The orderly led me to the dressing tent, over a maze of tent ropes and a doctor started to adjust the bandages that were again soaked with blood. I went to sleep while he was busy for I did not feel anything now in my arm, and the orderly awoke me to lead me back to the tent. Again I no sooner seemed to get to sleep before I was woken up and I found that there were a lot of boys cursing their luck that they had to get out and go, so early in the morning, (about 4:30) to entrain for the C.C.S.

After we had something to eat we started toward the train and were soon inside. I got into a box car and set on the floor next to the door and nursed my arm in my knees. I didn't care whether we got there or not, I had lost all ambition and was mighty weak from loss of blood.

I will finish here as we are now to the morning of the 28th of September 1916. Maybe I will finish some day by writing of the trip to Blighty. The nurse gave me a cup of coffee when we were going out of the harbour at Boulonge and I did not remember any more until the next morning at 6:00 when I woke to find that we were at Dover.

(The End)

## JUDICIAL SALE FARM PROPERTY

NEAR CHAUVIN, ALBERTA

Pursuant to Judgement and final Order for sale, there will be offered for sale subject to the conditions and reservations expressed in the original Grant from the Crown or in the existing Certificate of Title, and excepting mines and minerals, with the approbation of the Master of the Supreme Court of Alberta, Judicial District of Edmonton, by George F. Reynolds, Auctioneer, at his office in the Town of Chauvin in the Province of Alberta on

Saturday, JUNE 25

1921 at the hour of 2 o'clock in the afternoon.

The North-west quarter of Section Thirty-six (36), in Township Forty-three (43), Range Three (3), West of the Fourth Meridian in the Province of Alberta.

The Vendor is informed that the property is situated 5½ miles from the Ribstone Railway Station. The soil is rich, dark, loam with clay sub-soil. There is a well on the property. There is a house 14x32, Logs and Lumber, Shingled roof, one storey. Cow shed

## SUNFLOWERS AND DROUGHT

The sunflower has great drought and frost resistance. Owing to this fact it may be planted earlier and harvested later than corn. Sunflowers can be planted in the spring just as soon as it is possible to get on the land. The young plants will withstand the late frost which may ensue. Exceptionally heavy freezing weather may make sunflowers nod their heads but rarely is it ever cold enough to prevent them from again looking up to the sun. This ability of the sunflower to withstand cold enables it to even beat the most resistant types of corn which have so far been developed when it comes to making a

heavy yield of fodder during unfavorable seasons. When it comes to withstanding dry weather the sunflower again has an advantage over corn. When corn wilts for lack of moisture the entire plant collapses. Sunflowers under the same conditions lose their lower leaves in succession, but the top remains green. This enables the plant to continue growth as soon as sufficient water again becomes available.

## KITCHENER KILLED BY MINE

The mystery of Lord Kitchener's death finally has been authoritatively solved and the cause of the sinking of the battleship Hampshire definitely

established by information from German Admiralty sources showing that the Hampshire was destroyed by one of a group of thirty-four mines laid by the submarine U-75 on May 29, 1916.

This information not only settles the long standing controversy as to whether the Hampshire was torpedoed by a submarine or mine, but also in the opinion of German experts convicts the British Admiralty of responsibility for Kitchener's death. Admiral Jellicoe, according to official British statements, ordered the Hampshire to follow a course west of the Orkneys on the assumption that at the date of sailing, June 5, German submarines were not operating in that vicinity so far north.

A German submarine commander had, as a matter of fact, laid a mine-field in this well known route of warships six days earlier and Admiral Jellicoe should have been warned by the sinking of a chartered minesweeper there on June 2. The news apparently had not reached him or was not considered, owing to confusion over the battle of Jutland, and the warship, which was expected to carry the fortunes of England since Lloyd George, as well as Kitchener, originally was scheduled to sail for Russia on the Hampshire was directed straight into the mine-field—the only one laid by the Germans in that vicinity.

## ADJUSTMENT OF PRICE

With the falling prices for most products of the farm the question is being asked if the outlook for a young man starting today is equal to that of ten or twenty years ago. True, not, all of the products have reached the pre war level, yet the tendency is downward and the prices for articles purchased are declining very slowly. A writer in an exchange points out that although in the years centring around 1900 oats were selling for 20 cents and cattle for about \$3 per hundred the costs of production were also low. Labor was then rated at \$20 to \$30 per month with board and machinery at about half the present figures. Considering that land is now valued higher, and the living expenses are greater this writer concludes that the situation is unquestionably worse than it was twenty years ago. In a period of falling prices the farmer's outlook is never as bright as in a period of rising prices. A process of readjustment must, however, bring a measure of relief to the farmer in the next few years. To some extent it is being forced now by the inability of the farmer to pay the high prices for machinery, clothing, boots and other articles. By supplying more of his own needs in foods he can weather the storm until prices of manufactured goods come more nearly into line with natural products.

## NEW PUBLICATIONS

## (Poisoning Grasshoppers)

Circular No. 59. This four page leaflet, issued by the Manitoba Department of Agriculture, gives particulars as to the Manitoba grasshopper poison mixer; ingredients used in baits, and how materials are mixed and scattered.

\* \* \*

## Conservation Of Soil Fertility And Soil Fibre

Report of conference held at Winnipeg, 1920, to consider best methods of increasing and preserving the productivity of farm lands through intelligent management. —Commission of Conservation, Ottawa.

The report deals with Western crop production; choice of crops, and soil productiveness; cropping systems for drought areas; advantages of systematic crop rotations; good seed; soil moisture; fundamental principles of soil fertility; sil drifting; windbreaks; weed menace, and the need of further irrigation development in Southern Alberta.

Division of Health, Ottawa. Copies either in English or French may be had on application to the Department.

## UNIVERSITY WEEK FOR YOUNG PEOPLE

Preparations are being made by the Department of Extension of the University of Alberta for the third annual Conference for farm young people to be held during the month of June under the joint auspices of the University, the United Farm Women and the United Farmers of Alberta.

"University Week for Farm Young People" will be held at the Alberta University at South Edmonton from June 8 to 14 inclusive. Delegates will be housed in the dormitories and

board and room for the week will be furnished at a nominal cost. Accommodation is available for 250. The programme, occupying the full week,

will consist of a well balanced course of lectures on subjects of special value and interest to young farm people, nature study tramps, wholesome recreation in the form of group games and physical drill, moving pictures, community singing, and visits to the Parliament Buildings and other places of interest.

## AIMS OF RED CROSS

The aim of the Canadian Red Cross is to make this improvement in conditions general all over Canada. The membership enrollment campaign which will commence June 5 and last one week is a mighty effort to so increase the membership of this organization that a big percentage of people in every community, subscribing to the tenets of this society, will assist in making Canada a cleaner and healthier place to live in.

## Small Bank Accounts

We welcome even the smallest accounts and extend the same service to the patron depositing one dollar a week, as to the firm banking thousands.

Moreover, that deposit of \$1 a week, continued regularly, and including interest at 3% compounded semi-annually, gives you a balance of \$280.26 in five years.

## HIS GRACE ARCHBISHOP O'LEARY SAYS

"The Red Cross Society is indeed worthy of every commendation on the part of the public. It is a principle that the higher the aims of a society, the more worthy is that society of public support. The aims and objects of the Red Cross Society are of the noblest, the purest, and the best:—public welfare on behalf of those less blessed by the goods of this world, the mitigation of suffering, alleviation of the ravages of the war. This means that your society will be an outstanding light through the quality of its charity, when hand in hand with humanity, charity such as yours is destined to bring all classes of mankind closer together."

## RED CROSS MEMBERSHIP CAMPAIGN

HON. GEORGE P. SMITH,

MINISTER OF EDUCATION: SAYS

"Since the Junior Red Cross was organized and since the School Authorities have undertaken to introduce it to the Schools, and I have heard the specific cases that so far have been dealt with through this Junior Red Cross, I must say that it appeals very strongly to me, not only from the standpoint of the individual child who needs it, but especially the effect it has on all the children. It teaches them not to be selfish, to give at all times of their time and ability to help others. This is being taught by the concrete cases being brought forward by the Junior Red Cross. It will do much to develop right ideas of citizenship in our Boys and Girls. The purpose of all effort is to do good to the community in which we live and the neighbours whom we find beside us."

## Recent Alberta Legislation

### THE JURY ACT

Subject to many exemptions any inhabitant of the Province over twenty five and under sixty years of age who is a British subject shall be liable to service as a juror in civil and criminal cases tried by jury in the Judicial District in which he or she resides.

No woman shall be compelled to serve as a juror unless prior to the service of a summons upon her she signs a document signifying her willingness to so serve.

The Sheriff of each Judicial District shall before the first day of November in each year compile from voters' lists or assessment rolls a separate list for each of the places fixed for sittings of the Court. The lists for Calgary and Edmonton shall contain not less than five hundred names, for other places not less than one hundred names and such list shall be returned to the Clerk of the Court.

Until the Parliament of Canada entitles that it shall not be necessary to keep a jury together during the adjournment of a trial for indictable offences no woman shall be summoned to serve on a criminal jury.

Every jury shall consist of six persons any five of whom may return a verdict in civil action but in criminal cases, the verdict must be unanimous.

Full directions are given for the drawing of the jury panel by lot.

In all actions triable by a jury, if

a woman be a party to the action she may at any time notify the Clerk of the Court that she desires three women to be upon the jury and in such event the jury shall be composed of three women and three men. If all the parties of an action be women they may at any time notify the Clerk that all the jury be women and in such event the jury shall be composed of six women. If the rights of a woman or women or any who are not parties to the action are involved such woman or women or any party to the action may apply to a judge for an order that one-half or all of the jury may be women and the judge may make such order as to him seems proper, provided always that the notice and application for such jurors must be made at least twenty days before the opening of the sittings of the Court at which the trial is to be held.

Every woman summoned and every woman who having signed a consent to serve as a juror who fails to obey the summons shall be liable to a fine not exceeding \$50.00 or to imprisonment not exceeding thirty days or to both fine and imprisonment.

This act shall come into force on the first day of August 1921.

### AN ACT TO AMEND THE GAME ACT

The open season for prairie chicken remains not two weeks from the 15th October to the 1st November. The limit of ten birds to be killed by one person per day has not been changed but the total to be killed by one per-

son in one season has been reduced from one hundred to fifty birds.

The open season for Hungarian partridge is the month of October as formerly but the number that may be killed by one person in one day has been increased from five to ten and in one season from twenty-five to fifty birds.

The close season for muskrats has been extended and now stands from May 1st to December 1st instead of November as formerly 1st.

Penalties as for violation of the Act may now be imposed for violation of any regulation made under the Act.

Every railway or express company or other common carrier shall make a return to the Department of Agriculture before the tenth of each month showing the shipments of pelts or skins of wild animals received for shipment or shipped beyond the boundaries of the province.

The onus of proof that the tax has been paid shall be on the party in whose possession the pelt or skin is found and any person evading or attempting to evade payment of the tax in any way shall be liable to a penalty of not less than Ten Dollars and costs for each offence.

Every postmaster, every major and secretary or city, every reeve and secretary of a village or a municipal district every commissioner for oaths, every notary public, every justice of the peace, every secretary of public or separate school board, every sheriff, deputy sheriff or acting sheriff, every clerk or deputy clerk of the Court of any Judicial district, every officer, non-commissioned officer or constable of the Alberta Provincial Police, every issuer of game licenses shall have power to issue licenses or permits to carry firearms and to issue a permit in Form 76 referred to in section 118 of the Criminal Code. No charge shall be made for any such license or permit.

### AN ACT TO AMEND THE VETERINARY ACT

Graduates of any veterinary school or college approved by the senate of the University of Alberta who have passed the examination prescribed by the senate and who present to the association a certificate to that effect signed by the registrar of the university shall be entitled to be registered as veterinary surgeons.

The said senate shall control the conduct of and all matters relating to the examination of candidates and may approve of certain veterinary schools or colleges as places of instruction, prescribe the conditions upon which any veterinary school or college may be approved, prescribe the subjects upon which candidates shall be examined, determine the fee which shall be payable by candidates and make rules and regulations respecting the times when examinations shall be held and respecting the applications of candidates therefor.

The right of a candidate to appeal from the board of examiners to the minister has been struck out.

### AN ACT TO AMEND THE HOSPITAL ORDINANCE

A government grant from the first day of January, 1920, is fixed at fifty cents per day for each person admitted to a hospital or treated therein. An extra per diem allowance may be made to every hospital which provides for the treatment of patients suffering from tuberculosis or any other special class of patients. Regulations made by order in council or by any hospital board and approved by the minister shall have the same force and effect as if they were provisions of the act.

The local authority within whose area a person has had his home for at least three successive months before being placed in a hospital, if notified by the hospital within a reasonable time by registered mail shall pay the hospital the public ward charge per day of that hospital, such charge is not to include any fee to a doctor and where the charge cannot be collected from the patient the maximum amount payable by a town

or a municipal district shall be \$200 and by a village \$100.

In the event of the death of a patient and his burial by the hospital the local authority shall repay said hospital such sum as may be fixed from time to time by the minister.

If any local authority enters into an agreement with the hospital for the care and treatment of its residents for an annual sum, the terms of payment fixed herein shall not apply.

The board of every hospital shall in respect to every child born in the hospital cause the proper form under The Vital Statistics act, to be filled up and signed by the mother before she leaves the hospital and thereafter to be forwarded to the registrar of vital statistics.

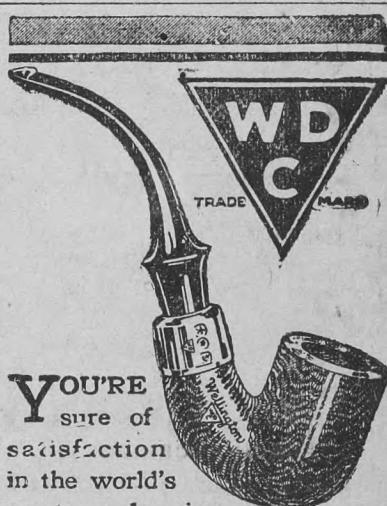

### AN ACT RESPECTING THE TAXATION OF LAND FOR EDUCATIONAL PURPOSES

All land not exempt shall be annually taxed three mills in the dollar of the assessed value. The tax on any parcel containing at least one acre in any subdivision or in any fraction of a section shall be at least twenty five cents. Every occupant of land exempt from taxation shall be annually taxed three mills in the dollar of the assessed value of the land occupied by him and in respect of his interest therein.

\* \* \*

Every occupant under grazing lease or permit shall be taxed one and one half cents per acre of the land so held.

**AN ACT TO AMEND THE SAVINGS CERTIFICATE ACT**  
Saving Certificates may be issued for an amount not exceeding five million dollars outstanding at any one time at a rate of interest not to exceed 5 p.c. per annum.
